

CAREER OBJECTIVE

I am a Computer Science undergraduate pursuing B.Tech with a strong interest in software development, emerging technologies, and continuous learning. I aim to apply my technical, problem-solving, and communication skills while gaining practical experience and contributing to organizational growth

WORK EXPERIENCE

Student Coordinator

Aug 2024 - Sep 2024

Panipat Institute Of Engineering & Technology (Smart India Hackathon - SIH), Panipat

Coordinated with faculty members and student participants during Smart India Hackathon activities. Assisted in organizing the event and ensuring smooth communication among teams. Helped manage participant queries and supported event logistics. Worked collaboratively with volunteers to ensure successful execution of the hackathon.

EDUCATION

B.Tech, Computer Science & Engineering

2024 - 2028

PANIPAT INSTITUTE OF ENGINEERING AND TECHNOLOGY

TRAININGS / CERTIFICATIONS

SSH-01 Hackathon

Apr 2026

Panipat Institute Of Engineering & Technology, Panipat

Participated in a 10-hour hackathon. Recognized as a member of the Best All-Girls Team. Designed an AI-assisted jewellery website using AI tools. Collaborated with team members to complete the project within the given time.

Smart India Hackathon (SIH)

Aug 2024 - Sep 2024

Panipat Institute Of Engineering & Technology, Panipat

Participated in Smart India Hackathon. Assisted in event coordination as Student Coordinator. Collaborated with students and faculty during the event. Developed teamwork, communication, and event management skills.

PORTFOLIO

PROJECTS

[Stupefy ↗](#)

Jun 2026

Built a Spotify-inspired frontend using HTML, CSS, and JavaScript. Designed album, artist, playlist, and chart sections with a clean dark-themed interface. Focused on improving frontend development and UI design skills. Currently enhancing the project by adding responsiveness and interactive features.

[AI-Assisted Jewellery Website ↗](#)

Apr 2026

- Designed and developed a responsive jewellery website using AI-assisted tools during the SSH-01 Hackathon.
- Created an attractive and user-friendly interface to showcase jewellery products.
- Collaborated with team members to complete the project within the 10-hour hackathon.
- Learned practical web design, teamwork, and rapid problem-solving under time constraints.
